

The 10-Point STR Automation Checklist

The tasks worth automating first, for short-term rental managers.

Tick what you already have covered. Flowstead's free audit ranks these for your operation and points to the three with the biggest time payback.

01

Instant guest messaging

Auto-reply to enquiries, bookings and pre-arrival messages across every channel.

02

Automated check-in details

Door codes, wifi and directions sent on schedule, then revoked after checkout.

03

Channel calendar sync

One calendar pushing availability to Airbnb, Booking.com and Vrbo to stop double-bookings.

04

Booking-to-cleaning handoff

Every new booking creates a cleaning job with the right turnaround for your team.

05

Owner statements and payouts

Monthly owner statements generated and emailed automatically from your booking data.

06

Review requests and alerts

Review invites sent at the right moment; low-star reviews flagged for your reply.

07

Pricing and sync health checks

Get pinged the moment a rate fails to push or a listing falls out of sync.

08

Mid-stay upsells

Early check-in, late checkout and extra-night offers sent at the right moment.

09

Enquiry capture and follow-up

Website and DM enquiries routed to one inbox with timed, templated follow-ups.

10

Maintenance and supplies

Guest-reported issues create tickets; recurring consumables reordered on schedule.
